

Joke Lines (GAGSHACK)

GAGSHACK

We have developed an enhanced joke-line application which utilises artificial intelligence and voice recognition. We have a portfolio of 17 different wind-up jokes. Our range has been tailored to have material suitable for male or female, young or old. Using **AI** and Voice Recognition, our jokes can now listen to what the victim is saying and respond accordingly – just like a real conversation. These are without doubt the most realistic wind-ups in existence!
