

## Text Chat

Text Chat is the simplest and perhaps the most effective Premium SMS service yet developed. The direct equivalent of a Live 121 Chat service, it allows users to communicate directly with our experienced operators.

Each message is charged to the user's phone when the message is received (MT Billing) and each user is identified by their mobile number, which gives a complete history of all text conversations to our operators.

If you require profiled operators, this can also be implemented into our services.

Text Chat comes in either Adult or Non-Adult formats.

We can offer you a standard text chat service, or our latest service that incorporates picture messages for the latest handset users.

This service runs at £1 or £1.50 per message.
