

Virtual Chat

VIRTUAL CHAT / MESSAGE EXCHANGE SERVICES

Virtual Chat (also known as Message Exchange) is a hybrid service which allows callers to listen to the names and descriptions of other callers on-line. If the caller wants to send another caller a message they record the message and the system simply passes it on to the person they have chosen. The service is monitored to prevent abusive or offensive messages being passed between parties and 'enhancers' means that there is always a great atmosphere on the line ensuring high average call durations.

We are able to offer our standard service or a fully branded service to fit in with your marketing and or branding.

This service is available at 25ppm 60ppm £1 or £1.50per minute
